

## Dome Nut

We are counted one of the most prominent manufacturers and exporter of Brass Flange Nut. This nut is engineered at our unit using premium raw metals which are obtained from the authentic vendors of the market with the aid of advanced technology and high end machines. Our offered product is suitable to be applied on any type of machine for tight & durable fitting. This Brass Flange Nut is available with us in various specifications as per the variegated needs of our customers.

Flange Nuts have a wide flange at one end that acts as an integrated, non-spinning washer, this can be serrated or non serrated. This serves to distribute the pressure of the nut over the part being secured, reducing the chance of damage to the part and making it less likely to loosen as a result of an uneven fastening surface.

The flange may be serrated or non serrated to provide a locking action. The serrations are angled such that they keep the nut from rotating in the direction that would loosen the nut. The serrations help in preventing the vibration of the nut from moving the fastener, thus maintaining the holding power of nut.

Materials:

- Mild Steel (MS)
- Brass
- Stainless Steel
- Copper
- Silicon Bronze

Nut Types:

- Hex Nut
- Hex Flange
- Lock Nut
- Jam Nut
- Castle Nut
- Wing Nut
- Cap Nut
- Thumb Nut
- Square Nut
- Cage Nut
- Weld Nut

Standards:

- Din 6923, Din 6927
- ISO 4161
- JIS B 1190

Size:

As per customers requirement and specifications.

Finish:

- Nickel Plating
- Chrome Plating
- Tin Plating
- Copper Plating
- Blue Zinc Plating
- Yellow Zinc Plating
- White Zinc Plating
- Silver Plating
- Gold Plating
- Brass Plating

Any types of Nut can be developed as per customer's requirement & specifications
