

Vibrating Screen

We specialize in the manufacture of industrial screens. We stock extensive range of wire screens from 3 mm aperture to 63 mm. These screens are manufactured in thickness up to 10 mm providing a sturdy life.

Most screens are clamped to provide hooked screens to provide for tensioning. The clamping of the hook's are done at 45-60 degree angle. There are three types of hooks

- Plain wire hook (for 8 & 10 mm thickness)
- Sheet metal hook (for 2mm to 7mm thickness)
- Sheet metal hook with double fold (less than 2mm thickness)
- The screens are manufactured using Spring Steel wire (High Carbon).
