

Flat Belt

L-020 Flat Belt, excellent heat resistance and durable. We can produce every kind of ironing belt which has different materials, thickness and width, which with a good dimensional stability and suitable for all kinds of flatwork rotary ironing machine. We have four types of ironing belt, and the customer can choose them depend on different craft, types of ironing machine and working temperature.

L-021

Needle type of 100% Nomex (Meta Aramid) ironer belt, three types of thickness, 2mm, 3mm and 5mm (100% meta-aramid ironing belt of 2mm thickness can replace and outperform the traditional (brown) Chicago belt. Advantage: high air permeability.

L-022

50% Nomex (meta aramid) and 50% polyester fibers, we use 100% Nomex for the base cloth, which have better stability and longer lifespan.

L-023

Chicago ironer belt (aramid ironer belt), brown, especially used on Chicago machine.

L-024

Woven type polyester ironing belt (canvas belt), especially used on Chinese made machine.
