

# Coal Crusher

**Coal Crusher** with high-speed rotation hammer to break the coal into pieces. **Coal Crusher** consists of simple structure, high crushing ratio, and high production efficiency and can make two forms of crushing dry and wet. We design impact hammer type **Coal Crushers** which are very suitable for low power consumption, durability, longer life, low noise level, and high performance. We are using an impact hammer which is made from special grade material to give optimum result during the crushing operation. Our range of coal crushers finds applications in coal handling plants and thermal power plant. We supply hammer crushers having a capacity of coal crushing 3 tph to 15 tph.
