

Crane Works

Range is widely used in steel, cement and energy plants. V.V. Industries provide effective material flow solution. This can be achieved for loads up to 10T in single girder EOT cranes.

Single girder travelling cranes adapt to various building applications .Motor used for frequent starting, reversing and braking are done by using the remote. Easy maintenance and outstanding travel characteristics ensuring safe handling.

Furthermore, these cranes ensure minimum dead weight, wheel loads, headrooms, clearances and reduced building costs. We have delivered several single girder EOT cranes to our clients around the country. This continuous effort to deliver the best have made us to become one of the best single girder EOT crane manufacturer in Chennai. Contact us for the best quote.
