

Agitators

Our agitators are machines used in various industries for mixing liquids together, promoting the reactions of chemical substances and keeping homogeneous liquid in bulk during storage. Also, these are widely used for handling various processing applications of dyes, intermediates, pigments, pesticides, fine chemicals, rubber chemicals, bulk drugs, API and nutraceuticals.

Our range includes

- Mixing agitators
- Industrial agitators
- Chemical agitator

Application Areas

- Homogenization / Blending
- Liquid - Liquid Mixing
- Gas - Liquid Mixing
- Solid - Liquid Mixing / Reaction / Suspension
- High Viscous Mixing Applications

Features

- Trouble free lifelong operations
- Easy maintenance
- Quality proven
- Dimensional accuracy
- High tensile strength
- Fine finish
