

Empowered with rich industrial experience, we are instrumental in designing and delivering an extensive range of Drill Vice for our most valued customers. Our drill vice are customized with sizes, dimensions and other specifications required by clients. We are precisely manufacturing from alloy steel, and further these drill vices are ideal for grinding, light milling and drilling processes. Our drill vice are widely used and demanded in diverse industries for drilling purposes. With aspire to provide the mechanical industry, we have a superiority to design and extend high quality drill vice that can be availed at competitive prices. Our high-tech manufacturing unit and experienced workforce severely monitor the complete process right from the sourcing of raw material to the ending dispatchment.

---

## Features of Drill Vice

- High tensile casting
  - Jaws made out of alloy steel are ground finished.
  - The long slotted bolts are provided to formulate position easily and quickly on drill press table.
  - Additionally, the flat surfaced head allows simple vertical positioning.
  - The most important screw is contrived from tested mild steel with special deep square threads completed on automatic threading machine.
-

# Specification of Drill Vice

Model	Jaw width(mm)	Jaw opening(mm)	Standard packing	Net weight
D-75	75	75	4	7 Kgs.
D-100	100	100	4	11 Kgs.
D-125	125	125	4	15 Kgs.

**Note :** Looking for Drill Vice? Discover the widest range of drills at SK Industries. We are having the most extensive program of Drill Vice with us in stock. The reliable and robust machines are professional quality with an extra-strong column and maintenance. Further our drills are conducted according to the latest directives.
