

Raceway

We make a wide range of raceways. Best used for data networking cables for IT usage in industries, our raceways are known for exacting dimensions. This makes them ideal for commercial, industrial and residential environments.

These raceways are installed in schools, hospitals (laboratories, MRI, OR, ER), offices, warehouses. Trusted for usage against rusting, these raceways can be used where direct straight line cabling is not possible. In Punjab we are supplying our material in various cities. Jalandhar, Amritsar, Ludhiana, Patiala, Bathinda, Batala, Mohali, Firozpur are few to name.
