

Heat Exchangers

We manufacture Shell & Tube type Heat Exchanger of any capacity using Codes like TEMA, our in house machining / drilling facility help us to maintain the accuracy and fast delivery. Our expertises are in SS, CS, Copper, High Nickel martial. Besides shell & tube we manufacture fins type HE for air/ liquid application in any size and any type of material.

Our specially designed condenser's coils are usually made of copper tubes and aluminum fins. This helps it to transfer heat as rapidly as possible and demand minimal cleaning for the better transfer of the heat.
