

Valves & Flow Meters

Flow Meters

EXCEL Gas provides complete solutions for flow measurement applications. EXCEL Gas supplies equipments suitable for measuring liquids like water, viscous oils, hydraulic oils, coolants, all gases, bio gas, natural gas, propane, butane, ethane, poly alcohol, compressed air, combustion gases, chemicals, solvents and acids.

Valves

A valve is a device that regulates the flow of a fluid (gases, fluidized solids, slurries, or liquids) by opening, closing, or partially obstructing various passageways. Valves are technically pipe Fittings, but are usually discussed as a separate category.

We supply various types of valves for low as well as high pressure & flow ranges, with end fitting threading as per customers' requirement. These are used by our customers for different applications.
