

Engineering Components

We are a reputed Manufacturer, Supplier and Service Provider of a comprehensive range of durable, highly efficient Industrial process equipment and Engineering Components with robust construction and high tensile strength. Moreover we offer cost effective prices too.

Our range of products widely caters to the needs of Earth Movers, Cement, Paper Mills , Sugar Mills industry, Pressure Vessels under Llyods, TUV, SGS Inspection, pressure vessels under CCOE with 3rd party inspection, Oil & Chemical Storage Tanks.

Engineering Components

Levered by our well-equipped infrastructure, we offer a precision engineered range of Engineering Components much appreciated by our customers for high performance and superior quality. We also provide packaging service.

Features: Durable, Corrosion resistant, Cost effective

Heavy Duty Machining

Levered by our well-equipped infrastructure, we offer a precision engineered range of Engineering Components much appreciated by our customers for high performance and superior quality. We also provide packaging service.

Features: Durable, Corrosion resistant, Cost effective

Heat Exchangers

A broad range of Heat Exchangers manufactured using top quality raw material is offered at competitive prices. Designed by modern metal forming and cutting equipment, our range known for its dimensional accuracy and durability can also be fabricated in different material specification like carbon steel, stainless steel, aluminum bronze, naval brass, cupronickel and nickel.

Earth Moving Equipment Spares

we are one of the best vendor for BEML limited. We are supplying fabricated earth moving equipment components to BEML.

Features: Accurate Dimension & Corrosion –Resistant,

Application Areas: Tubes, Flanges, Piston Rods, End Caps / Covers, Pistons, Dry Bearings, Seal Kits, Spherical Bearings, Bushes for Rod Eyes / Clevis
