

Industrial Chillers

Types Air Cooled / Water Cooled with sealed & semi-sealed Compressors for temperature ranging from $+15^{\circ}\text{C}$ to -20°C .

Chillers are used for Process Enhancing which improves the Product Quality and reduction in Process time thereby increases the productivity. Package Chiller will be plug-in Type. It will have electrical and water in/out connection.

Features

- Robust construction for Heavy Duty.
- Highly Efficient Compressor.
- Trouble free operation.
- Micro-processor Precise Control.
- Easy user-friendly operation.
- High Efficiency Heat Exchanger with Enhanced Surface Copper Tubes.
- Increased Reliability and Durability.
- Ensures Pressure Safety.
