

Diffuser

- Manufactured in high grade aluminium sheet.
- Core is easily removable to facilitate damper adjustments.
- Available in 1-way, 2-way, 3-way and 4-way model.
- Diffuser have a flush face that provides an architecturally pleasing appearance.
- With or without vcd available.
- Standard finish: natural anodized & powder coated.

Armstrong board diffuser

- Manufactured in high grade aluminium sheet.
- Core is easily removable to facilitate damper adjustments.
- Available in 1-way, 2-way, 3-way and 4-way model.
- To suit armstrong board tile (modular ceiling) of size 600mm x 600mm.
- Diffuser have a flush face that provides an architecturally pleasing appearance.
- With or without vcd available.
- Standard finish: natural anodized & powder coated.

Tegular diffuser

- Manufactured in high grade aluminium sheet.
- Core is easily removable to facilitate damper adjustments.
- Available in 1-way, 2-way, 3-way and 4-way model.
- To suit armstrong board tile (modular ceiling) of size 600mm x 600mm.
- Diffuser have a flush face that provides an architecturally pleasing appearance.
- With or without vcd available.
- Standard finish: natural anodized & powder coated.

Circular diffuser

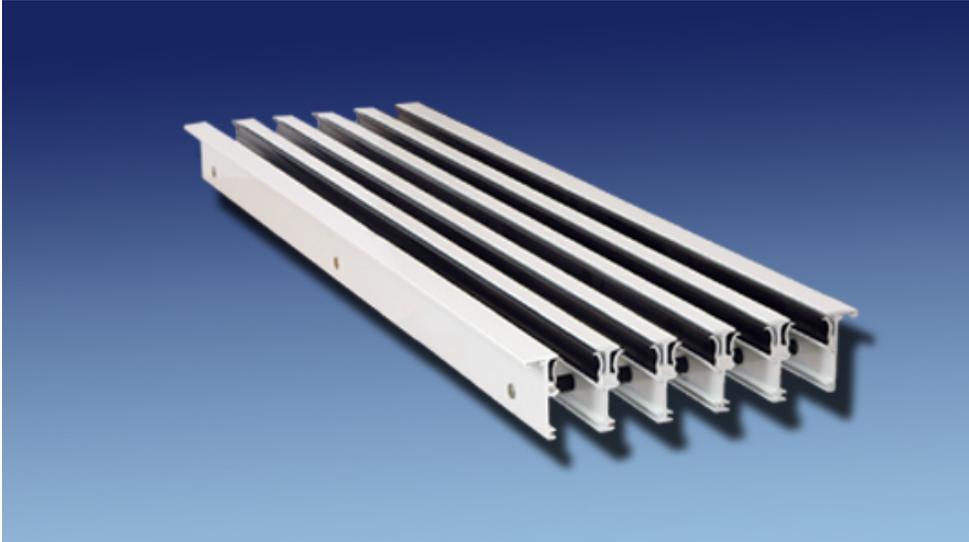

- Manufactured in high quality of aluminium sheet.
- Draft free 360 air distribution pattern.
- Flush, half step, full step configuration available.
- With or without vcd available.
- Standard finish: natural anodized & powder coated.

Stripline diffuser

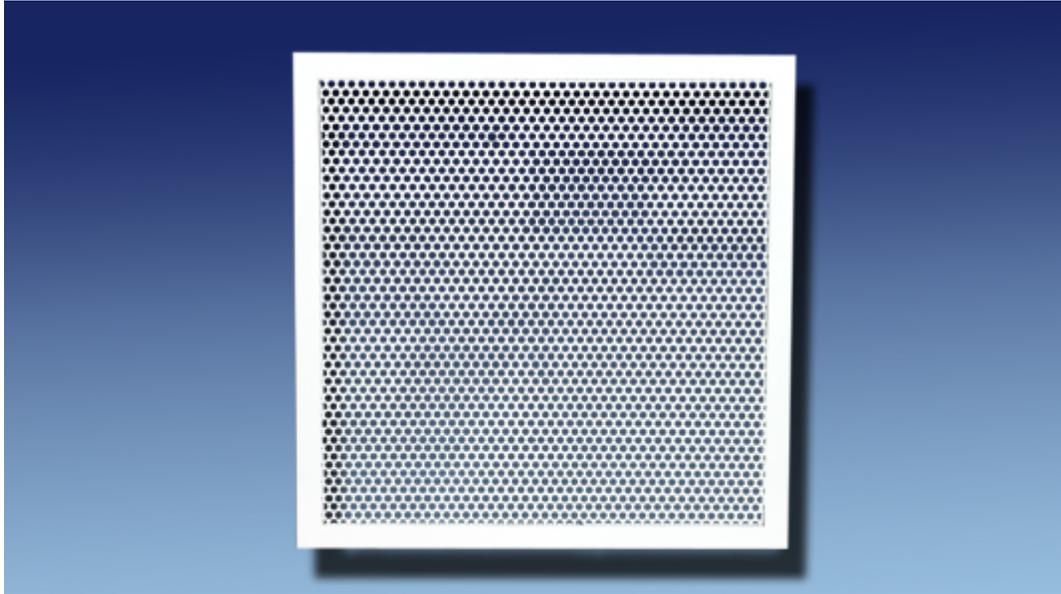

- Manufactured in high quality aluminium extrusion profiles.
- Finned blades provide horizontal airflow pattern.
- Air flow controlled by volume dampers.
- Standard finish: natural anodized & powder coated.

Slot diffuser

- Manufactured in high quality aluminium extrusion profiles.
- Attractive design slot diffuser made out of extruded aluminium mainly for the installation into ceiling and sill. Can be installed on walls also. Available for 1 to 8 slots additional on request.
- Horizontal or vertical air discharged by adjustment of air deflection blades.
- Fine control of air by means of integral air straightener and hit and miss damper.
- Manufacture by mechanical assembly to assure rigidity and maintain straight line appearance.
- On multi slot diffuser, each slot is individually adjustable.
- Standard finish: natural anodized & powder coated.

- Perforated diffuser

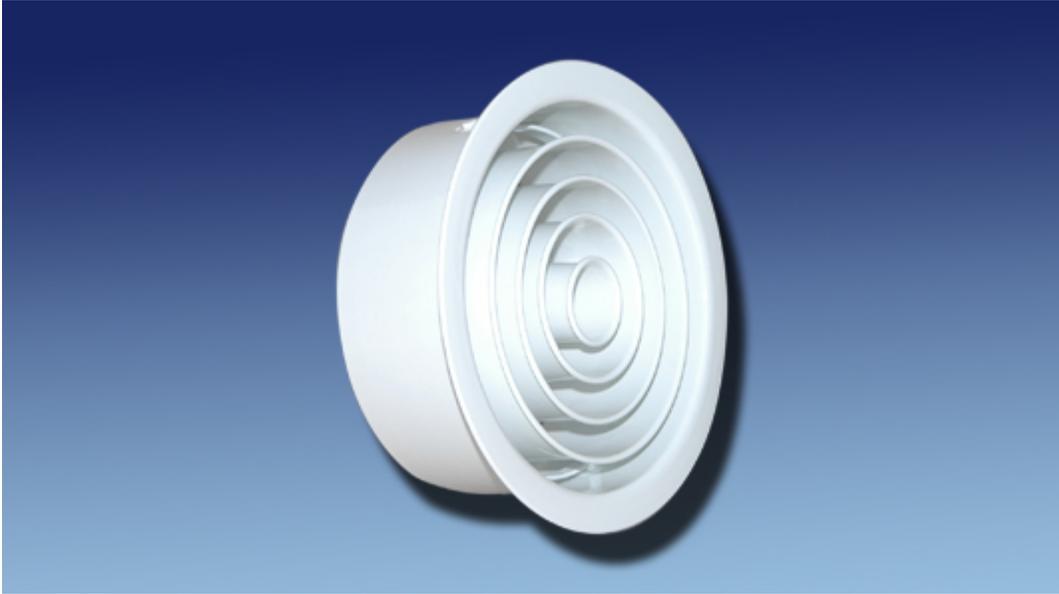

- Manufactured in high quality aluminium sheet and extrusion profiles.
- Ideal for supply / return air through false ceiling.
- Accurately punched perforations using cnc machine.
- To suit standard tile size of 600mm x600mm or 600mm x 300mm.
- Non standard size also manufacture upon request.
- Standard finish: natural anodized & powder coated.

Swirl diffuser

- Manufactured in high quality aluminium sheet.
- Swirl diffuser designed for ceiling mounting and has fixed pattern of air diffusion.
- Swirl diffuser provides an excellent indoor climate, even when the temperature of the supply air is below the room air temperature.
- Swirl diffuser composed with pre-rotation vanes which are vertically arranged.
- Standard finish : natural anodized & powder coated.

Jet diffuser

- Jet diffuser is made up of high quality aluminium.
- Jet diffuser are designed for use in large areas long throw such as sport centres, theatres, airport, entertainment and industrial area.
- Jet diffuser suitable for air conditioning evaporative cooling or ventilation application.
- Jet diffuser can be rotated by 360 degree by adjusting the core.
- Jet diffuser are available in with or without panel.
- Standard finish: natural anodized & powder coated.
