

Vessels

We are amongst the reckoned manufacturers, suppliers of wide range of FRP Vessels that are treasured amongst the clients for optimum quality and seamless strength. Our entire product range is corrosion resistant in nature and has long service life. Moreover, we offer them at most affordable rates.

Materials of Construction:-

We have the infrastructure and the facilities of the manufacturer of FRP Vessels Using Isophthalic Polyester, Bisphenol Polyester, Vinyl Ester, Epoxy Resins and other plastics such as Polypropylene (PP), Polyvinyl Chloride (PVC). Dual Laminates using thermoplastic as liner for Chemical resistance and external FRP armour for strength are also fabricated.

Feature:-

- Quality tested
- Excellent designs
- In compliance with industry standards
- Easy to install
- Available in varies capacities
- Resistant to corrosion & abrasion
- In compliance with industry standards
- Light weight
- Affordable costs
- High strength

FRP Vessels:-

We are enlisted amongst the reckoned names in the industry, offering an extensive range of FRP Vessels that are acclaimed among the clients for optimum quality and exceptional strength. Our entire product range is light in weight and is performance based. Our warehouses are well-configured with advanced technologies and tools that assist us to systematically store the entire product range.

PP & FRP Vessels:-

We also offer a wide range of PP FRP Vessels that are considered to be on the best in the market. Customized as per the requirements and specifications of the clients, these products are used at various industries for multiple applications. Our team of skilled and trained professionals also test these products as per the global standards of quality. Manufactured from raw material that is procured from the best of vendors in the industry, these products have high tenacity and are sturdy in nature.

PVC & FRP Vessels:-

Keeping in mind the diverse requirements of our clients, an extensive range of PVC FRP Vessels that are manufactured using quality assured raw components and advanced technologies. Offered product range is leak proof in nature and have well-tested welding joints with dimensional stability. Clients can avail the entire product range in different configurations and are delivered in stipulated time frame.

Process & Pressure Vessels:-

We Design, Manufacture and Install all types of Reaction Vessel with Agitator and Gear-Box Assembly and FRP Pressure Vessels . Reaction vessels are designed with special considerations as per user's requirement such as rotating speed of agitator with different types of Gear-Box and required capacity of equipment which are high in quality and gives trouble free performance. These reaction and pressure vessels are designed for acid & alkali etc. The material of construction depends on chemicals used, temperature during process and depending on required pressure etc. These are fabricated out of industrial plastics like FRP, PVC/FRP, PP/FRP, FRB, FRE and FRV etc of various shapes & sizes as per client's operational requirements. Our range of Industrial Vessels includes Quenching Vessel and Reactor Pressure Vessel.
