

CO₂

Shriji Gases is a renowned Carbon dioxide gas manufacturer and supplier, both in liquid and compressed gas forms. Carbon dioxide (CO₂) is a slightly toxic, odorless, colorless gas with a slightly pungent and acidic taste. In air, Concentrations of carbon dioxide is about 0.038% by volume.

Carbon dioxide gas is commercially produced by fermentation of Sugar compounds in beer, bread and liquor making industry as it's by product. Other way of its production is by combustion of carbohydrates, natural gases and fossil fuel like wood and coal. The CO₂ produced is liquid in nature. This liquid CO₂ is being stored in carbon dioxide gas cylinders for any further industrial/lab grade applications.
