

Bharati Oxytech Pvt. Ltd.

Nitrogen

The nitrogen market in India has not reached its full potential but is getting a boost due to the development many new applications. Nitrogen today is used in food processing and packaging, cold storages, oil and gas exploration, pharmacy and also for animal husbandry. The company markets nitrogen in different packaging and grades to cater to various customer segments.

Characteristics:

- No smell
- Does not burn.
- Inert except at high temperature.
- Non-toxic but does not support life, so could cause asphyxiation in high concentrations.
