

CPAP-BIPAP Series

EVOX CPAP machines are primarily used to treat obstructive sleep apnea, while BiPAP machines are used to treat central sleep apnea, complex sleep apnea, or COPD. We also supply TWINPAP, which is a combination of CPAP & BIPAP. We also have BIPAP NIV Mask which is adjustable with height & depth support. It gives optimal convenience for Cpap/Bipap Therapy. and comes with a special non sticky Velcro soft belt. Additional features are adaptive head gear locks and removable silicon cushion.
