

Domestic Pump

- Applications

- For handling clean and non aggressive liquid.
- Gardens and Irrigations.
- Building services.
- Water dewatering and circulation in industries.
- Domestic supplies.
- Water transportation.

- Features

- Capable of priming upto 3m static suction lift.
- Withstand wide voltage fluctuation from 180V - 240V.
- Self primes upto 7.50m.
- Prevents motor burning due to thermal overload protector.
- Capacitor start and run motor with IP44 protection.
- Double shielded ball bearings.
- Light weight pump for easy handling.
- Easy maintenance and spare availability.
- Powder coated multi-color stator body.
- Sturdy and compact.
- Pumpset available with extension shaft.

- Operating Limits

- Operating water temperature upto 65°C.
- Maximum working pressure 5.50kg/cm².
- Lower power consumption.
- Clean and clear water.
