

Pultrusion

Ghaziabad Polymers Pvt. Ltd is one of the fastest growing Pultruded section of different profile manufacturer in India. Since we are leading in FRP equipment for more than two decades. GPPL'S molded and Pultruded section meets the International standards for its high strength, corrosion resistance higher durability and unmatched finish. We offer this material for application in different field and different application like Gratings, Cable Tray, Cooling Tower Application etc. Be it robustness precision or compact we always meet the requirement with our experienced team, cutting edge machinery, a well-developed infrastructure and most importantly motivated workers. We manufacturer all these items with best available raw materials which has very good reputation for their compatibility.

FRP Pultruded Mouldes Gratings

Features

- Manufactured from various selected resin system.
- Long durability.
- High chemical resistivity.
- Light in weight.
- Easy installation.
- A wide range of profiles.
- High load resistivity.
