

Industrial Chiller

Reciprocating Chiller

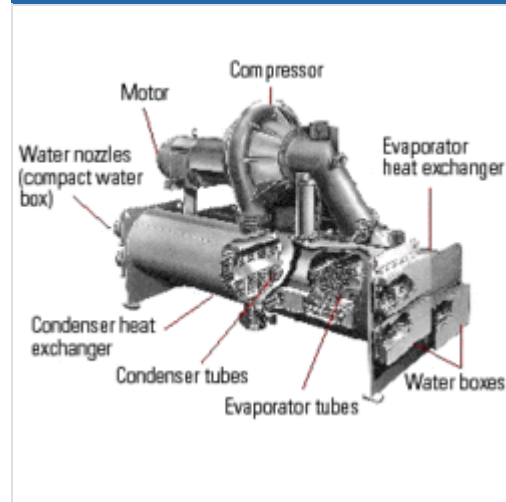

We hold expertise in providing an extensive range of **Reciprocating Chiller**. To meet clients' specific requirements, we are providing this chiller in various technical specifications that makes it ideal for a number of air conditioning applications. In addition to this, offered chiller is checked on various quality parameters to assure its unmatched quality and durability. Customers can avail this chiller from us at market leading prices.

Features:

- Safety and protection
- Adaptive controls
- Reduction in energy cost

Centrifugal Chiller

Backed ourselves with sound amenities and talented personnel, we have emerged as one of the leading firms of superior quality of **Centrifugal Chiller**. Our offered chiller is manufactured using premium quality components and advanced technology at our well equipped manufacturing unit. We are offering this chiller in technical specification to meet with the need of our vast range of customers. To deliver quality approved chiller, our vendor's quality controllers thoroughly test it on various quality parameters.

Features:

- Low power consumption
- Rigid construction
- Maintenance free

Screw Chiller

With the help of our state-of-the-art infrastructure unit, we are able to trade and supply the superlative quality of **Screw Chiller**. Provided chiller is strictly checked by our vendor's quality controllers in accordance with set industry standards. This chiller is provided in variable speed screw chiller that helps in achieving optimum efficiency in thermal storage, process cooling and comfort cooling applications. Our offered chiller is manufactured utilizing premium quality components and modernized technology.

Features:

- High energy efficiency
- Low maintenance
- Sturdy construction

Scroll Chiller

With the valuable assistance of skilled team of professionals, we are offering an extensive range of high quality **Scroll Chiller**. To manufacture this chiller, quality assured components and advanced technology is used by our vendor's experienced professionals. In addition to this, our offered chiller is rigorously checked by our vendor's quality controllers on various parameters. Provided chiller is complete assembled liquid chiller that has striking features like ease of installation and has microprocessor controllers to ensure maximum operating efficiency.

Features:

- Energy-efficient at both full and part load
- Designed for quiet operation
- Saving floor space and installation time

Laser Chiller

Ozone air solution are the leading manufacturer of energy efficient air cooled & water cooled chilling plants ranging from 0.75 Tr To 100 Tr nominal cooling capacity for industrial applications. Also we manufacture innovative & most success full product of **Laser Chiller** & panel ac for diamond & automation industry. This offered device is used in maintaining laser temperature to ensure optimum quality performance and long service life of industrial lasers and medical lasers systems. We are offering this device using quality approved components and advanced technology.

Features:

- High consistency
- Easy to install and manage
- Low power consumption
