

Gantry Crane

Gantry Crane is available in both Single girder and Double girder type. It is useful for outdoor applications. The crane has two legs that are shaped in an 'A' frame design that comes along with wheels at the bottom. These wheels run on rail line, thus named as Rail Mounted Gantry Crane.

These cranes are appreciated for their attributes like easy installation, lightweight and simple structure. We offer these cranes in single and double main gantry cranes. These Gantry Cranes find high applications in handling and conveying equipment in mills, mines, harbors and enterprise stations. These are generally used outdoors in Engineering Industries, Ship yards, Ports, Granite, Steel Yards, Cement Pipe Industries, Open Yard, Storages places, Container Depots etc.

Features

- Economical material handling in those area where overhead crane system is not easily available
- Made From Quality Material
- Easy Installation and Maintenance
- Safe and efficient
- Smooth Functioning
- Cost effective
- Rigid Design
- Require less Maintenance
- Simple Installation
- Ideal For Construction Sites

Advantages

- Complete Mobility
- Quick Assembly with bolt-together components
- Versatile
- Easily Customized
- Available Power Drive Kits
