

Electronic Scale

Single loadcell based scales for industrial applications. Made from Strong Angles or channels with an epoxy coated steel indicator, they are able to withstand rough handling experienced in industrial units. 12.5mm LED display is visible in all light conditions and consumes minimal power. Scales are provided with a standard inbuilt surge arrestor and a RFI / EMI filter. Loadcells used are minimum 150% overload rated. Scales can be provided with a stainless steel, or mild steel checkered top plate based on customer requirements. Can also be constructed entirely from stainless steel for Chemical, Food and Pharma applications
