

Rubber O-Ring

RUBBER O-RING

Quad Rings

We are specialized in offering a range of quad rings, which are designed to withstand high pressure conditions in application areas such as in hydraulic cylinders. These are fabricated by us using the quality tested material such as aflas, viton, silicone, nitrile, HNBR, EPDM etc. Known for their accurate dimension and high tolerance, these rings help in preventing hydraulic fluid leakage and also help the system during the operation. Our range is available in different thickness and diameter ranges, that includes : Inner diameter 17mm-120mm Thickness from 1.78mm-7.0mm

RUBBER O-RING

Rubber O Ring 1

We are engaged in fabricating rubber o-rings which are extensively used in Petroleum, Cement, Electrical, steel and allied industries. These rings are primarily used for the packing and leakage problems. We also offer oil seals with metal and brass bondings, hydraulic seals, hydraulic & pneumatic seals, o-rings, inches & metric o-rings, endless rubber o-rings, gaskets and oil seals in varied types of synthetic rubber, silicon, viton, neoprene in more than 5 metres. Moreover, these can be easily customized in accordance with client necessity and can be delivered within specified time frame. Following are its noteworthy features: Waterproof Wearing resistant Abrasion resistant

RUBBER O-RING

Rubber Endless O-Rings

We provide comprehensive range of Rubber Endless O-Ring / Gaskets, which are highly acclaimed for its auto resistant to climatic variations, application specific designs and dimensionally accurate features. The

se O-rings are basically used for the sealing purposes to stop the leakage and it is a torus shaped objects. Procured from genuine vendors, we use good quality of raw material in the production of our gamut. The raw material includes elastomeric compounds such as O Rings, Nitrile (NBR), Hydrogenated Nitrile (HNBR) , EPDM, Neoprene, Silicone, Fluoroelastomer (FPM), PTFE and 50/90 Shore Hardness. Furthermore, these are fabricated in compliance with international standards and are delivered within stipulated time frame.

RUBBER O-RING

Encapsulated O Rings

We offer a wide range of encapsulated O rings, which are used for resilience and sealing force application s in various industries such as petroleum, cement, electrical, automobile etc. Our range is manufactured with a relatively thin, moulded encapsulation of Teflon FEP or PFA polymers. These encapsulated O rings s offer from high friction and have limited resistance to aggressive chemicals and gas permeation. Further, we also provide these rings in customized specifications and at highly competitive prices.

RUBBER O-RING

Rubber O-RING

We are manufacturer supplier and exporter of all rubber o rings in all material like silicone, NBR, Neoprene, PTFE, Teflon, Nitrile, EPDM etc, we have many sizes available we manufacturing Rubber o ring as per your Size or Drawing or Sample
