

D-Stoner Machine

Swastik vibro shifter is one of the most versatile machine, Which can perform the operation of classification, Grading, Oversize or Under size Removal, De-watering, Fiber recovery, Filtration or any type of SIZE based separation

Swastik vibro shifter is Reliable and Economic Solution for any Screening, Grading, Filtering or size separation needs in your process

Principle

Separation of materials is based primarily on specific gravity differentials of various material i.e. heavy and light materials can be separated.

Application

Over and equal from grains commercially used in float and splintery grains other of more **nearly equal.**

Construction

Fabricated from heavy gauge M.S. Plates and angle iron composite drive with electric motor hous

Drive

V-Belt drive through electric motor with belt tensioning arrangements.

Feed

Can be adjusted through manual operated damper.

H.P.	Deck Size	Capacity KG / Hr.
3	20" x 32"	200-350 KG
5	30" x 32"	450-700 KG
5	Double Deck	1500-2000 KG
