

Polisher Machine

Polish Horse Nails - Requires 2 H.P. Electric Motor.

The Horseshoe Nails Making Machines manufacture Horseshoe Nails, the nails are to be polished as well as finished products. The quality of the nails produced depend upon the wire used on the machines, generally the wire received from the supplier is found dull to wire drawing process and also some times get rusted due to weather effect.

The wire for processes of cutting nails is not so bright and as a result, the nails produced do not have brightness and shinning. Such finished are not acceptable to the buyers thus the nails do require polishing which result in attractive finished products to eliminate this problem. We have manufactured polishing machine.
