

Screw Conveyors

Our company manufactures heavy duty Screw Conveyors that are used in diverse industrial applications. These screw conveyors are specially designed for handling free flowing material. These screw conveyors are offered in varied sizes ranging between 75mm diameter and 1000mm diameter. Available in standard as well as custom-made designs, these screw conveyors provide hassle-free performance in all conditions.

Features

- Sturdy construction
- Capacity to carry huge load
- Less wear and tear
- Easy to use
- Safe to handle
- Low power consumption

Applications

- Feed
- Sugar factory
- Starch Chemical
- Fertilizer Plants

Specifications

- Long lengths may be achieved by the use of hanger bearings at intervals, however we prefer where possible to engineer these bearings out due to the maintenance requirements.
- A full range of sizes for capacities from a few kg per hour kg per hour to 200 T / hr.

Production Application

- Ideal for conveying and feeding Grain, spices, Coffee beans, Flour, Cement, Gyphum, Coal Salt, Sawdust, Woodchips etc.
- Full enclosed and adaptable to suit nearly all applications
