

Machinery Parts

Machinery Parts

Application

- * For PU foam Cylinders, Nozzles etc.

Material

- * Stainless steel (SS303, SS304, SS416)
- * Aluminum (Al 6061)
- * Low Carbon Steel (1018, H11)

Specification

- * Maximum size: up to dia. 250MM & 200mm Square.
- * Drill & Bore Size: Up to 70MM

Tolerances

- * Drill: Up to 10 microns
- * Bore: Up to 7 Microns
- * PCD Hole: Up to 12 Microns

Shafts Wheels

We design and manufacture a wide range of dimensionally accurate worm shafts and wheels. Together they are used in various automotive and mechanical systems. Made from superior quality steel alloy, these shafts and wheels increases the efficiency and speed of the system. These are offered in varied diameters, lengths and modules as per the specific industrial requirements.

Control Panel

We offer our clients highly functional control panels, which cater to the specific requirements of our patrons. Fabricated using high quality raw material and advanced technology, our control panels are of various types like automation control panels, electric control panels and ul listed control panels.
