

# Corrugated Pipes

## Description

Flexible Corrugated pipes are manufactured in many colours. These pipes are lightweight, flexible and possess more strength. They can bent on turnings and are thus fast replacing rigid bends. Have excellent flexibility with high ring stiffness for greater resistance to crushing & burying at considerable depths.

## Product Range

16mm, 20mm, 25mm, 32mm, 40mm,50mm

Available Colours: White, Grey, Black

## Salient Features

- Highly Flexible
- Uniform rings
- Lightweight thus easy to transport
- Cannot deform easily
- Have company Label on Rings

## Dimensions

Nominal	Diameter	Maximum	Inside	Minimum	Bending	Coil Length in meters.
---------	----------	---------	--------	---------	---------	------------------------

mm	Diameter mm	Radius	
16	11.5	48	25
20	14.6	60	25
25	19.0	75	25
32	24.5	96	20
40	32.0	120	15
50	42.2	150	10

### Applications

- For water discharge in washing machines
- Use in Computer Wire Ducting
- Water discharge in vacuum cleaners, wash basins
- Transfer of air at normal pressure in industries.
