

# Ribbon Blender

## Details

Ribbon Blender is best in dry powder mixing with the best result& at minimum budget. This mixer is designed in U shaped with 5 – 10,000 liters working capacity.

Our offered Blender is specially fabricated with different grade of steel like stainless steel, carbon steel & alloy steels as per customer need. Our product is environment friendly, which required very maintenance & electric energy. Our design is available in different material like low, medium, large & mega volume capacity to mix small to large size material. In Ribbon Blender We use Very sharp blades are installed in this, which mixes different soft to hard material at less time.

## Product Details

Product Description	
Material	Stainless Steel
Power Source	Electric
Voltage (V)	230-380 Volt
Automation Grade	Automatic

Product Description	
Frequency (Hz)	50Hz
Motor (HP)	2HP
Phase	Single Phase
Surface Finishing	Polished

Being one of the renowned firms in the industry, we are involved in providing a high-quality array of 2HP Ribbon Blender.
