

# Laboratory Weighing Balance

Micro Laboratory Balances has been designed to meet high requirement for measuring small masses with high readability ( $d = 1 \text{ mg}$ ). They are equipped with graphic display with user menu.

If you are looking for the **Best Laboratory Weighing Balance Manufacturers in Delhi**, Contact Us now.

In order to guarantee proper accuracy of measurement, a half automatic system of external calibration with E1 standard weight has been applied.

Micro balance consists of two balance components. One of them contains electronic modules & other precise mechanical measuring system. Such solution guarantees elimination of temperature changes influencing the indication micro balance.

Micro balances series CM are offered with 3 capacity 5grn. & 2lgrn (with readability 1 mg) balances are equipped with esthetic, cylindrical! Shaped weighing chamber with glass draftshield. All elements of weighing chamber are manufacture from glass or metal which minimize the influence of electro static charges on weighing result. Micro Balance equipped with user friendly menu User has access to multiple functions & measuring units which allow for specification for working requirements. Micro Balances software allows for composition of GLP procedures as standard printout or of freely definable non-standard printout series.

**Balances CM are equipped with Rs232, Ps2 o/p & possibility of connecting additional display as standard.**

## Features:-

- Easy to read large backlit GRAPHICAL LCD display with A.E.P, (Advanced Eye Protection) (NEW)
- Standard RS-232 C interface I Ps2 output.
- Built-in Internal Calibration with function like E1 standard weight.
- Initial Calibration.
- Auto calibration according to change in ambient temperature.
- User selected time calibration.
- oCheck weighing
- oStatistic
- Conforms to GLP/GMP & ISO 9001 Standard.
- Improved Repeatability for better results.
