

# Rubber Sheet

The favourable wear and shock-absorbing characteristics of rubber sheeting make it suitable for applications exposed to tough conditions. Fluted and patterned rubber sheeting is used, for example, as protective flooring in industry and vehicles.

Materials: EPDM, Chloroprene, Nitrile, Nature/SBR, Silicone and Viton®.

Hardness: 40 – 80 sh

Temperature range: -60 °C – 275°C

Approval: UL-94 approved fire resistance and certain qualities suitable for foodstuffs.
