

# Counter Scales

Advanced Micro Controller Technology, Millisecond response time, KG facility, Price calculation facility, Alarm on over weight or load, Computer interface with RS 232 (optional), Bright LED display, Designed for Indian standards, Strong body with rugged design, High quality load cell, Switched are touch friendly, Auto calibration of weight, Long lasting material for heavy duty work loads

## Technical Specifications

| Name                 | Feature                |
|----------------------|------------------------|
| Power supply         | 230V AC + 10%          |
| Frequency            | 50Hz + 2%              |
| Operating Temp.      | 10 C to 45 C           |
| Power Consumption    | 10 W                   |
| Type of Sensor       | Load Cell              |
| Warm-up Time         | Few Second             |
| Rechargeable Battery | 6V 4.5 AH              |
| Over Load Capacity   | 150% of Rated Capacity |
| Pan Size             | 175x225 mm             |
| Capacity             | 1,3,5,10 kg            |
| E Value              | 100,500 mg,1,2 g       |
