

Mobile Compressors

Product Description:

We excel in offering a wide range of Mobile Compressors. These are manufactured using optimum quality components which are sourced from trustworthy vendors of the industry. Demands of these Mobile Compressors are increasing day by day owing to its application specific construction, accurate dimensions, robust design and uninterrupted performance. We ensure longer service life and consistency of our devices.

Features:

- Unique cool-box design for better component life
- High flow for better flushing
- High pressure for faster drilling
- External, single point lifting bail for easy hoisting
- Automatic shut down safety device for
- High discharge air temperature
- Low engine oil pressure
- High engine coolant temperature
- Powder coated steel canopy for durability and surface finish
