

Automatic Appalam-Machines

We offer a wide range of Automatic Appalam Machine, that is used in preparation of Papad or applum. This machine process papads or appalum at very high speed with its automated process that reduces the processing costs. Our automatic appalam machine can also be used in manufacturing thin dough sheet products.

Automatic Appalum Machine

Automatic Appalum Machine

Process:

The basic ingredients are mixed in a separate mixer. The dough just needs to be loaded in the hooper of the appalam machine. The dough are then transferred into sheeter and gauge roller of the machine, where thickness of the papad or appalam can be adjusted. The food grade conveyor carries the round cut papad into the oven which is heated at the exit tray of the machine, users will get hygeinic papads without any burns.
