

Monoblock Pumps

We are a leading Supplier & Trader of Monoblock Pumps such as Centrifugal Monoblock Pumps, Centrifugal Mono Block Pumps and Regenerative Monoblock Pumps from India.

Item Code: BP-Series

Centrifugal Monoblock pumpsets volute chamber and impellers are designed to give the best possible hydraulic efficiency and good suction lift characteristics. Most modern and highly sophisticated machinery and technology are engaged in manufacturing these pumpsets, using quality raw materials, dynamically balanced impellers and rotors to ensure long life. These pumpsets are powered by a totally enclosed fan cooled AC Induction two pole motor or four pole motor, suitable for continuous duty. Motor stator is made with low watt loss silicon steel laminations assembled under pressure and rigidly locked in the frame. The windings are of high-grade enamelled copper wire and are varnish impregnated. Construction of motor frames and usage of quality materials result in high performance and low temperature rise thereby increasing the life cycle of the motor. These pumpsets require adequate motor protection control panel. We want local enquiry from Gujrat and Ahmedabad

Centrifugal Mono Block Pumps

Item Code: CTS-Series

S.S Centrifugal Monoblock pump's volute chamber and impellers are carefully designed to give the best possible hydraulic efficiency and suction lift characteristics. Most modern and highly sophisticated machinery and technology are employed in the manufacture of these pumps, using quality raw material, seals and ball bearings to ensure long life. Dynamically balanced rotor ensures vibration free and noise free operation. Shaft is made of quality steel, precision ground of ample size for transmitting the rated Horse Power. High operating efficiency has resulting in lower power consumption. Inbuilt thermal overload protector in all single phase pumps helps to prevent overload. We want local enquiry from Gujrat and Ahmedabad
