

Industrial Demineraliser

Industrial demineralisers are available in a full range of sizes and flow rates. They are design for both counter current or cocurrent regeneration. “AFI-DM-ID” series plants are offered in TEN MAJOR configuration, strong & weak cation, strong & weak base Anion, mixed bed exchanger together with CO2 degassifiers, depending on raw water analysis and minimum operating cost.

Model of DM Plants

DM Plant							
Sr No	Model No	Output Between Regeneration based on				HCL as 33%	Naoh as 100%
		200	300	400	500		
1	88	6	4	3	2	16	4
2	1010	11	7	5	4	30	6
3	1313	17	11	8	6	49	11
4	1616	30	19	14	11	85	18
5	2424	74	48	35	27	210	45
6	2430	117	76	55	43	210	71
