

Flaker Machines

We are manufacturer and suppliers of flaker machine. It will be very use full in guar gum industry. Crushing of the material is done to meet requirement of coarse material. Two hardened rolls rotate towards each other. They are kept nearer to each other by means of either mechanical devices or with hydraulic system helps to create the pressure on the rolls and make the crushing possible. The larger particals of mass, cereals, pulses are pushed between the rolls uniformly spread and with continuous rate through a separate device.
