About us

Quality Policy

"We at Hamidi are committed for customer satisfaction through timely delivery of quality products and continual improvement in our systems."

Our quality systems comply with "ISO 9001:2008" system of quality standard and CE certification to deliver quality product.

Our team and process flow chart ensures that the quality is met at every stage of manufacturing and packaging. We have complete traceability in all of our lots and provide test certificate (3.1 Certificate of Inspection as per EN ISO 10204) to all of our customers.

Hamidi Exports is a subsidiary of Hamidi Group, which was established in the year 1967 with the guidance of its founder S. Malkiat Singh. Since then the group has achieved new heights in manufacturing of Fasteners in India and abroad with constant efforts of their sons and current partners of Hamidi Exports - S. Jaswant Singh and S. Sukhwinder Singh.

Hamidi Exports (An ISO 9001-2008 and CE certified industrial unit), is located in Ludhiana, Punjab (INDIA) since 1992 and is manufacturing wide range of fasteners for both domestic and international market.

Hamidi product range includes fasteners with diameter ranging from 6mm to 100mm, length ranging up to 1250mm, in all grades and finishes covered under various DIN, ASTM BS, ANSI, IS and ISO standards. Our 100% manufacturing utilization capacity exceeds 800 metric tons per month.

Hamidi Exports is also a Government of India recognized export house with Exports ranging from 85-90% of total sales volume. Some of our key markets include U.S.A., U.K., Ireland, Canada, Spain, Venezuela, Egypt, Netherlands, Czech Republic, Turkey and Middle East.

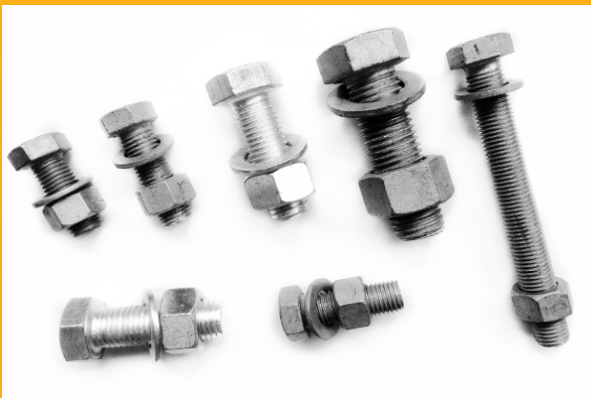

Our infrastructure entails latest technology for the manufacturing process, including cold & hot forming, metal gathering, precision machining and galvanizing. Further, the company is well equipped with all the modern testing equipment in our Mechanical Testing Lab. Expert technicians monitor the entire process starting from purchase of raw material till the finished products to ensure high quality International Standards. We have full traceability in all operations and material lots. Every lot undergoes a strict checking at every stage of production. We provide test certificates of supplied material as per International accepted standards.

The company believes in continuous up gradation of technology and innovation which has kept it ahead of others in the field of Fasteners. The company's technological superiority combined with a highly skilled team with 30 plus years of experience in fasteners has made Hamidi an icon for quality and performance; gaining accolades worldwide from our reputed customers. Our manufacturing facilities keeping pace with technical advantages purely define our corporate dynamism ready to confront the future challenges, infusing innovative thinking with bold initiatives.

Product Portfolio

Hamidi manufactures wide range of high tensile fasteners and automobile components meant for use in various industries such as in Heavy Earthmovers, Railways, Construction, Automobile, power transmission etc. Some of the broad categorized components are as follows:

Construction Fasteners

CE approved fasteners as per EN-15048 Part - I & II

Hamidi exports is a CE BS EN 15048 approved manufacturers for the supply of fasteners to our worthy clients in Europe and manufacture as per following standards:

Bolts / Screws - As per ISO 4014 and ISO 4017

Nuts - As per ISO 4032 & ISO 4034

Washers - As per ISO 7089 & ISO 7091

Surface - HDG, Zinc Plating, Black oxidation & Phosphating.

In addition to the above mentioned, we manufacture:

SQ SQ Holding down assemblies BS 7419, BS EN 14399-3 high strength structural bolting assemblies, ASTM A325M, ASTM A490M Bolting assemblies

Crash Barrier Fasteners

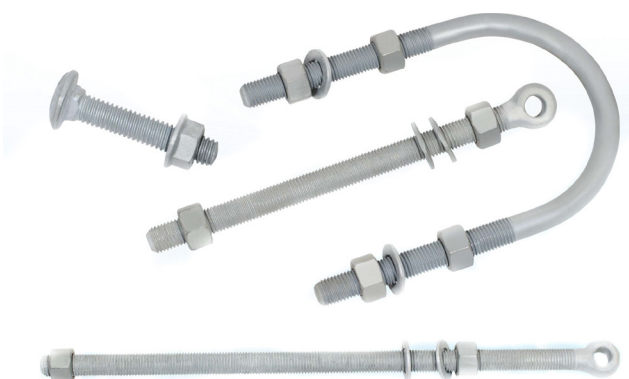

Hamidi offers various crash barrier fasteners, specifically used in Europe. Such as button head oval neck bolts, mushroom head bolts, cup nib bolts and the entire series of barrier bolting from F01-F28, F202 & F204. Most of these items are Hot dip galvanized as per expected standard of salt spray requirement.

Product Portfolio

Hamidi plays a role of leading supplier for the parts used for heavy earth moving machines & backhoe loaders such as JCB, L&T, Terex, etc. We offer tooth bolts, side cutter bolts, hydra clamp bolts, pinion nuts, differential axle bolts, etc

Heavy Earth Mover's Components

Hamidi offers all types of galvanized fasteners used in power transmission and mounting antenna for telecom towers. We provide all suitable grades required for specific impact strengths at different temperatures ranging from -40 degrees to +25 degrees

Power Transmission Fasteners

Hamidi offers various automobile fasteners for both LMV and HMV such as Volvo, Ford, Isuzu, Mercedes, Tata, Range Rover, Nissan, etc. Some of the major components we produce are wheel bolts / assemblies, front / rear hub bolts, T bolts, Center bolts, U Bolts, Nuts with revolving washers & axle bolts

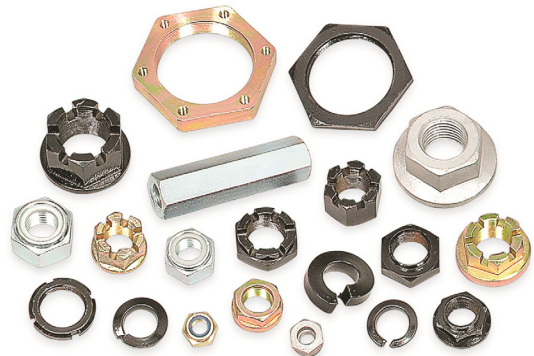

Automobile Fasteners

Product Portfolio

Hamidi offers wide variety of railway track fasteners like screw spikes, beaver spikes, drive spikes, fang bolts, track bolts, switch bolts & fish bolts. We mainly offer black, zinc electroplated and wax finish for these items

Railway Track Fasteners

Hamidi offers all types of industrial fasteners in all grades, shapes and finish such as Hex bolts, flange bolts, hex nuts, nylon nuts, castle nuts, lock nuts, coupling nuts, plain washers, spring washers, taper washers, etc.

Industrial Fasteners

Hamidi offers various tractor linkage parts such as lynch pins, hitch pins, chain assemblies etc.

Tractor Linkage Parts

Hamidi also offer customized products as per customer's design and specifications.

Other Forged Items

Infrastructure

We at Hamidi are committed to regularly upgrade our infrastructure to suit our customer needs and to achieve sustainability in the business. A brief snapshot of our infrastructure is as follows:

Impact Testing Machine

Cold Former

Universal Testing Machine

Microstructure Analysis

Hot Forging

Warehouse

Infrastructure

Cold Forming

Hamidi is well equipped with latest technology cold forging machines capable of making bolts up to 1" diameter and 200mm in length. Cold forming enables us to manufacture better quality product with high accuracy in size control. With current cold forming infrastructure, we are capable to manufacture 500 metric tons of fasteners in a month.

Hot Forming

Hot forming helps us to make large diameter (Up to 64mm) and longer length bolts (up to 1250mm). With friction screw presses, hydraulic presses, induction heaters etc., we are capable of manufacturing 300 metric tons of hot forged fasteners per month.

Material Testing Lab

We have a well-equipped material testing lab for testing fasteners as per international standards (ISO 898-1, ISO 898-2 etc.). Our Lab includes Universal Testing Machine, Impact Test Machine, Cooling Chamber for Impact Test, Torque Testing Tools, Hardness Tester, Microstructure & Decarburization Testing Apparatus and Salt Spray Test Chamber.

Galvanizing

We have in house hot dip galvanizing facility with capacity of galvanizing 10 metric tons of fasteners per day. Workers are properly trained according to our galvanization control plan suited to fulfill needs of international standards such as ISO 1461 and ISO 10684.

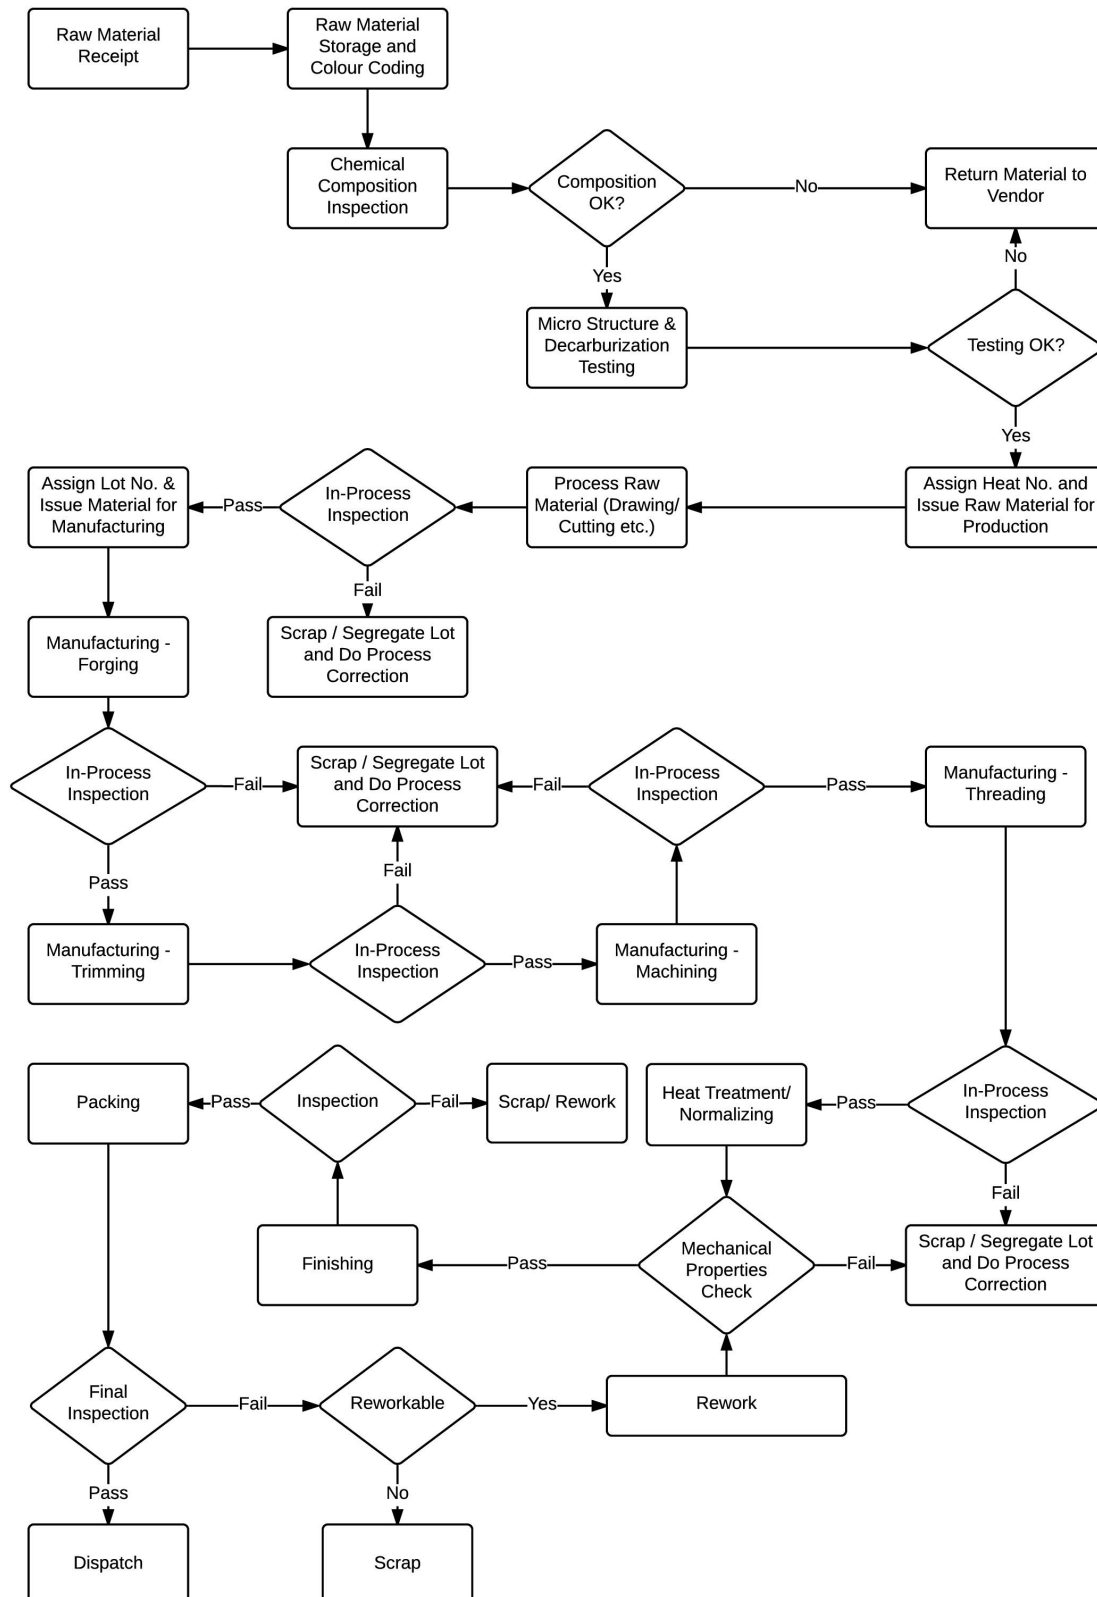

Heat Treatment

According to a study of fasteners, majority of fastener rejections are due to faulty heat treatment. We are currently in process of installing Mesh Type continuous heat treatment, which will help us to provide better heat treated fasteners with minimal variations in lots. The heat treatment facility will be operational by May 2016.

Material Handling

Well-designed bins, racks and trolleys enable quick and efficient material movement, helping us to achieve our goal of shorter delivery lead times.

Process Flow Chart

For every engineering industry, "HAMIDI" is capable of providing highly competitive and excellent quality fastening products and services.
