

## Moulding Blades

Moulding Blades are designed to make different moulding works from the architectural point of view at the edges of Granite, Marble & Sand Stone etc. for the decoration of Kitchen slabs, Table tops, Stairs (Nosing), Cornices, Parapets & Monuments etc. Moulding blades of various profiles are available.

Client has to provide the design of moulding blades with Technical parameters like diameter, width, tapered-flat step & radius (concavity & convexity) etc. as per his requirement. Water cooling holes are provided in the moulding blades.
