

Sand Bags

As the name suggests, the sandbags are manufactured to fill sand. The sand bags of our company make an excellent choice. They are used to construct the levees, brims, and barricades for wash away of sand during floods. The strength of the bags is high and our bags comply with the requirements of the government. They have two straps on the top to tie the knot. These sandbags are generally Unlaminated. These can be availed with or without the straps. You can contact us or write to us and know more about the price or sizes.
