

Stamping

Do you know that we offer stamped small parts?

With us you have access to complex stamped small parts such as springs, clips, shields, battery contact plates etc., in thicknesses from 0,1 to 3 mm. Manufactured at Ming Chiang Precision in Taiwan. The components are produced with follow-on tools in modern automatic presses of 35-200 tonnes and supplied loose, rolled in band or as tape & reel.

Book a meeting with us. We would be pleased to meet your company to get to know more about you and learn what parts might suit you.

Facts

- Very competitive tooling and part pricing
- Stock in Karlstad
- Prototypes can be supplied within 3 weeks without expensive tooling investment
