PP Woven Bags/Sacks

Woven Bags/ Sacks and Fabrics

Description :

PP Woven Bags/Sacks can be provided with both plain or printed, different sizes, types, colours, tear resistant, 100% customized PP bags/sacks, made from the toughest woven polypropylene fabric. PP Woven bags/sacks are very much ideal for the packaging covering the wide range of products as mentioned below:

1. PP Woven Uncoated bags – Without Lamination
2. PP Woven Laminated bags
3. PP Woven Printed bags
4. PP Woven Gusset bags
5. PP Woven Liner bags
6. PP Woven D- Cut bags

Application :

- Agriculture & Farming, fertilizers, urea, minerals , chemicals, resin, polymer
- Sugar, salt, lime, caustic soda, corn.
- Animal feeds, cattle feed stock.
- Seeds, spices, agro products, Cashew nuts, dates, barely, flour, rice.
- Building & Construction materials
- Concrete materials, cement

HDPE Woven Bags/Sacks

Woven Bags/ Sacks and Fabrics

Description :

HDPE Woven Bags/Sacks can be provided with both plain or printed, different sizes, types, colors, tear resistant, 100% customized HDPE bags/sacks, made from the toughest woven high density polypropylene fabric. HDPE Woven bags/sacks are very much ideal for the packaging covering the wide range of products as mentioned below:

1. HDPE Woven Uncoated bags – Without Lamination
2. HDPE Woven Laminated bags
3. HDPE Woven Printed bags
4. HDPE Woven Gusset bags
5. HDPE Woven Liner bags
6. HDPE Woven D- Cut bags

Application :

- Agriculture & Farming, fertilizers, urea, minerals, chemicals, resin, polymer
- Sugar, salt, lime, caustic soda, corn.
- Animal feeds, cattle feed stock.
- Seeds, spices, agro products, Cashew nuts, dates, barely, flour, rice.
- Building & Construction materials
- Concrete materials, cement

PP Woven Fabric

Woven Bags/ Sacks and Fabrics

Description :

PP Woven Fabric can be provided with both plain and printed, different sizes, types, colours, tear resistant, made up of good quality. And it can be customized as per requirement.

Application :

- PP Woven Small Bags
- PP Woven Big Bags
- PP Woven Box Bags
- PP Woven Post / Courier Bags

U Panel Bags

FIBC / Bulk Bags

Description :

Unique characteristics :

- Ideal, cost effective, economical and highly feasible source for packaging of free flowing material in the granular, powder or crumble form.
- Very easy to store and handle the FIBC with a standard equipment
- Bulk bags when not in use could be easily folded and requires very less space in comparison to the storage of empty fiber drums and other containers used for packaging.
- Bulk bags/FIBCs once packed and filled with material does not require any additional packaging.
- FIBCs are packed flat and square in a bale for the delivery of FIBC bags to the end users for their consumption
- Depending upon the bulk capacity of the product and its application, the FIBCs/Bulk bag comes with the guarantee of the Safe Factor of 5:1 and 6:1 for the Dangerous goods.

Product Features :

- Industrial grade clean production
- Safe Working Load (SWL) : 500 KG to 2500 KG
- Safety Factor (SF) : 5:1 (Single trip), 6:1 (Multi Trip) or as per customer requirement
- Size, Color & Type of FIBCs : As per the customer requirement & purely customized.
- Printing : Upto 4 Color Printing on each side
- Loops, Filling & Discharge options : As per customer requirement
- Liner : PE Liner from 40 to 120 Micron Thickness
- Packing : Packed on either Bale or Pallets.

Types of Bags :

- U Panel Bags
- Circular Bags / Tubular Bags
- Baffle Bags
- Tunnel/Sleeve Lift FIBC

Application :

- Food Industry like sugar, flour, spices, wheat, milk powder.
- Petrochemical & Chemical Industry for storing Granuals & other raw materials.
- Pharmaceutical industry
- Agricultural related products like fertilizers, animal feed & grass.
- Industrial applications like scrap materials, copper coils & slag, sludge waste
- Used in Construction related items like cement, sand and granite.
- Used in Transport for storing Non -flammable dry substance.

Polyester Multifilament Yarn

Polyester Multifilament Yarn

Description :

Features of Polyester Multifilament Yarn :

- Denier : 840/1000/1200 (Regular Yarn)
- Denier : 840/2 , 1000/2 , 1200/2 (Juki Yarn)
- Tenacity : 4 to 6 GPD Basic yarn
- Elongation : 20%
- Melting Temperature : 270 degree C.
- Resistance to Chemical & Sunlight : Good

Used for stitching PP/HDPE woven bags on manual stitching machines and automatic BCS machines of all companies such as Gabbar, Ginza and Newlong. Along with this Juki Yarn is used in FIBC Bags and Braided Yarn is used in braided pipes.

Advantages of Polyester Multifilament Yarn :

- 1) It is always cheaper than PP yarn.
- 2) It does not need oil for working on machines.
- 3) It is smoother than other yarns.

Application :

- Woven Sack & FIBC Industries
- Braided Pipe Industries.

Non Woven Bags

Non Woven Bags and Fabric

Description :

Non-Woven Bags can be provided with both plain or printed, different sizes, types, colours. 100% customized bags are made as per customer requirement made from the toughest fabric. Non-Woven bags are ideally used for the various products as mentioned below:

1. Non-Woven Carry bags
2. Non-Woven D-cut bags
3. Non-Woven U-cut bags
4. Non-Woven Printed bags
5. Non-Woven Handle bags
6. Non-Woven Packaging bags

Application :

- Packing
- Agriculture
- Health, Hygiene and Medical
- Industrial
- Chemical
- Clothing

Non Woven Fabric

Non Woven Bags and Fabric

Description :

Non-Woven Fabric can be provided with both plain and printed, different sizes, types, colours, tear resistant, made up of good quality. And it can be customized as per requirement.

1. **PP Non-Woven Fabric**
2. **Spun Bond Non-Woven Fabric**

Application :

- Packing
- Agriculture
- Health, Hygiene and Medical
- Industrial
- Chemical
- Clothing

HDPE Ropes (High Density Polyethylene)

Ropes

Description :

HDPE Ropes can be provided in a wide range of high density polyethylene monofilament ropes, which is known for its high durability and high functionality, light in weight and resistant to abrasion.

It can be customized as per your requirement and can be provided in different sizes, types and colours.

Application :

- Fisheries
- Engineering & Construction Industry
- Electricity Boards
- Transport Industry
- Shipping Industry
- Domestic purpose
- Mountaineering

PP Ropes (Polypropylene)

Ropes

Description :

Polypropylene Ropes can be provided in wide range, which is being lighter by nature and can be UV stabilized. It can be customized as per your requirement and can be provided in different sizes, types and colours.

Application :

- Safety float, anchor & mooring lines for small craft
- Mooring & barge lines
- Agricultural
- Building industries
- Household
- Ship docking, alongside towing & tie-downs/hauling
- Tying of truck & barrier
- Submersible pumps

Nylon Ropes

Ropes

Description :

Nylon Ropes can be provided in wide range in compliance with the standards of the industry. These are designed using high quality raw material and appreciated for their strength and better performance. It can be customized as per your requirement and can be provided in different sizes, types and colours.

Application :

- Mountain climbing ropes
- Safety lines
- Bow-to-stern towing hawsers
- Surge lines
- Lariat ropes
- Boat falls
- Drop hammer ropes
- Target tow rope
- Fishing ropes
- Industrial slings.

Twines

Twines

Description :

Baller Twines can be provided in different types as per the requirement. These are soft and uniform, with their superior knot holding capabilities are ideal for a wide range of application & are available in Loop and Reel form. It can be customized as per your requirement and can be provided in different sizes, types and colours.

1. PP Baler Twines
2. HDPE Twines
3. PE Twines

Application :

- Fishing nets
- Crop packing
- Agriculture
- Vegetable plantation
- The presses for balling straw
- Hay and fodders

Paper Bags

Paper Bags and Paper Cups

Description :

Paper Kraft Bags / Paper White Bags can be provided with both plain or printed, different sizes, types, colours, tear resistant and 100% customized. Paper bags are ideal for using for grocery purpose, medical purpose and also for shopping purpose.

We can provide paper bags ranging from GSM 50 to 150. And BF upto 40.

Types of Paper Bags :

- Paper Kraft Bags
- White Paper Bags
- Shopping Bags
- Grocery Bags
- Handle Bags
- D Cut Paper Bags

Application :

- Grocery
- Bakery
- Medical
- Shopping
- Garments
- Cloths
- Jewellery

Cast Stretch Film

Stretch Film

Description :

- Cast Manual Grade Stretch Film
- Cast Machine Grade Stretch Film

Cast Stretch Film can be provided in best quality in both machine grade as well as manual grade. This is a strong, premium grade, cast co-extruded film available in wide range of standard sizes and gauges.

Types of Stretch Film :

1. Food Grade Stretch Film
2. VCI Stretch Film
3. Anti-Static Stretch Film
4. UV Stretch Film
5. Coloured Stretch Film

Application :

- Food and agriculture industry
- Automotive industry
- Toys, stationery, promotional.
- Multipacks, biscuits, pizzas, chocolate boxes, bread, cheese and meats.
- Tray packing for packing of perishable foods, box lunches, prepared foods etc.
- Cartons, books, large appliances, pallet loads etc.
- Bundling of cases of soda water and beverage cans.

PET Strap (Polyester)

Strap

Description :

PET Strap can be provided of both plain and printed. We can supply customized strap in different sizes. Polyester strap is available in green, white and black colour as per the requirement.

Application :

- Building Material and Wood
- Pelletization
- Industries
- Metal Packaging
- Baling

PP Strap (Polypropylene)

Strap

Description :

PP Strap (Polypropylene Strap) can be provided of both plain and printed. We can supply customized strap in different sizes and in multi-colour as per the requirement.

Application :

- Building Material and Wood
- Pelletization
- Industries
- Metal Packaging
- Baling

HM Bags / LDPE Bags

HM Bags / LDPE Bags

Description :

HM Bags / LDPE Bags can be provided with plain, different sizes, types, colours. It can be provided with 100% customized made from HM and LDPE virgin raw material. HM Bags and LDPE Bags are very much ideal for the packaging and covering the wide range of Industrial , Engineering and Food products.

Application :

- Packing
- Engineering Products
- Industrial Products
- Food Products

HDPE Tarpaulin

Tarpaulin

Description :

HDPE Tarpauline can be provided in superior quality, highly durable; UV treated and water proof tarpaulin. We are well capable of meeting the desired specification by our clients. We can offer the entire range of products in varied sizes, shapes and colours as required.

Application :

- Cap Covers
- Floor Lining
- Truck Covers
- Poultry Curtains
- Machinery Covers
- Fumigation Covers
- Railway Wagon Cover
- Automobile Covering
- Construction Sites cover
- Suitable to protect any products from sunlight , rain and dust.

PVC Tarpaulin

Tarpaulin

Description :

PVC Tarpauline can be provided in superior quality, highly durable; UV treated and water proof tarpaulin. It is well finished PVC coated material. We are well capable of meeting the desired specification of our clients. We can offer the entire range of products in varied sizes, shapes and colours as required.

Application :

- Machinery Covers
- Fumigation Covers
- Railway Wagon Cover
- Automobile Covering
- Construction Sites cover
- Cap Covers
- Floor Lining
- Truck Covers
- Poultry Curtains
- Suitable to protect any products from sunlight, rain and dust.

BOPP Self Adhesive Tapes

Tapes

Description :

BOPP Self Adhesive Tapes can be provided in carton sealing tapes for economic grade, based on tough BOPP film coated on one side with emulsion type Acrylic Adhesive that permits application over a fairly wide range of temperature and surface. The strong backing provides good moisture and impact resistance. It can be customized as per your requirement and can be provided in different sizes, types and colours.

1. Transparent Tape
2. Colored Tape
3. Printed Tape
4. BOPP Jumbo Roll

Application :

- Packing corrugated boxes
- Household use
- Used at shops and plants
- Transparent tapes used for refrigeration, stationery, die-cut, impact preventing etc.

Cotton Bags / Canvas Bags

Cotton Bags / Canvas Bags

Description :

Cotton Bags / Canvas Bags can be provided with both plain and printed, different sizes, types, colours, tear resistant, GSM, 100% customized made from toughest fabric material.

Application :

- Shopping Bag
- Carry Bag
- Deigner Bag
- Advertisement Purpose

Air Bubble Roll

Air Bubble Roll

Description :

Air Bubble Roll can be provided with different sizes. It can be made 100% customized as per customer requirement made from the virgin material. Air Bubble Roll are ideally used for protecting Industrial and Engineering products from damage.

It is available in all GSM and size as per customer requirement.

Application :

- Packing
- Engineering products
- Industrial
- Clothing

Butyl Reclaim Rubber

Reclaim Rubber

Description :

Butyl Reclaim Rubber can be provided in best quality by us. It is very fine product recycled out of butyl rubber tube scrap. The scrap butyl tubes are pure good quality butyl. Also it is a harder and less porous material than other and has enough elasticity to form an airtight seal.

Application :

- Butyl Inner Tubes
- Tyre Inner Liner
- Adhesives, Cables
- Rubber flap
- Hoses, Black Coloured Rubber Product.
- Tape and sealants

HDPE Pipes

Pipes

Description :

HDPE Pipes can be provided in the best quality by taking care of the quality measures. It can be customized as per your requirement and can be provided in different sizes and types. We can also provide necessary fittings and accessories which are required to our customers.

Application :

- Lift and Gravity Water Supply Systems
- Sewerage and Drainage Systems
- Industrial Effluent Disposal Systems
- Cable Ducting
- Portable Water Supply
- Irrigation/ Agriculture
- Sprinkler System

cPVC Pipes

Pipes

Description :

cPVC Pipes can be provided by taking care of the quality measures. It can be customized as per your requirement and can be provided in different sizes and types. We can also provide necessary fittings and accessories which are required to our customers.

Application :

- Portable water supply in commercial buildings, residential homes and public places
- Waste water managements ,Swimming pools, RO plants and DM plants
- Industrial applications like milk dairies, chemical and gas plants, sugar and paper
- It is used in individual residential buildings, large residential complex, commercial building for hot and cold water supply
- Conveying of chemicals, effluents, oils and gases
- Micro-irrigation and Lift-irrigation
- Food & Beverage Industries

uPVC pipes

Pipes

Description :

uPVC Pipes can be offered in good quality. uPVC agriculture pipes and uPVC column pipes both are available and can be customized as per your requirement and can be provided in different sizes and types. We can also provide necessary fittings and accessories which are required to our customers.

Application :

uPVC Agriculture Pipes

- Irrigation purpose
- Potable water distribution in urban and rural areas
- Waste and rain water drainage systems
- Disposal of chemical effluent
- Main line for drip irrigation and sprinkler systems
- Telecommunication cable ducting
- Lift and gravity irrigation systems
- Industrial and domestic plumbing
- Distribution of oils & gases
- In horticulture
- Conveying chemicals and effluents transportation
- In green house technology
- Portable water supply management.

Paper Cups

Paper Bags and Paper Cups

Description :

Type : 1

- Capacity : 50 ML
- GSM : 180
- Printing in different designs
- Packing : 50 pcs / packet
- Cartoon : 280 Packets / cartoon
- Total Quantity : 14000 Pieces / Cartoon.

Type : 2

- Capacity : 65 ML
- GSM : 180
- Printing in different designs
- Packing : 50 pcs / packet
- Cartoon : 200 Packets / cartoon
- Total Quantity : 10000 Pieces / Cartoon

Application :

- Food & Beverages
- Soft Drinks / Hot Drinks
- Tea & Coffee

PIO Sugarcane Juice Machine

Sugarcane Juice Machine

Description :

PIO Sugarcane Juice Machine can be provided to our customers.

This Sugarcane Juice Machine is highly powerfull and small in size. It is world's first small and highly powerful machine without any tray and waste duct.

Application :

PIO MINI

- Runs by 0.5 HP single phase motor.
- Complete Construction by stainless steel.
- Production = 300 glass of juice per hour.
- Crushing capacity = 120 kgs/hour.
- Machine weight = 41 kgs.
- Dimension = 18" x 8" x 15"
- Juice efficiency = 65%
- Power consumption = Very economical say Rs. 1 for 100 glass juice
- Easy to Use.
- Easy to Clean

Natural Jaggery / Desi Gur

Natural Jaggery / Desi Gur

Description :

Jaggery is a "natural" sweetener made by concentration of sugarcane juice WITHOUT the use of any chemicals / synthetic additives or preservatives. **Jaggery** is a traditional accompaniment to Indian meals and is also used for preparation of various sweet dishes in place of Sugar.

It contains an enormous wealth of minerals / proteins / vitamins. More importantly, Jaggery has great nutritive and medicinal value. It has the reputation of being a medicinal sugar and is prescribed for use in the Ayurvedic system of medicine.

It is made by concentrating rich, tropical sugarcane that has been fully matured. In India, the finest of Jaggery is produced in Gujarat, Kolhapur and Tamil Nadu.

Application :

Types of Jaggery/Sugar which we can provide are :

- Lump Jaggery
- Jaggery Powder
- Liquid Jaggery / Kakvi
- Unrefined Jaggery Sugar (Bura)
- Masala Jaggery

Thank You
