

# Lamination Machine

## Main Features

This machine adopts PLC man-machine interface centralization of control. Its's integrally designed with machine electricity and gas system. It adopts T-die with high precision, high speed and efficient mixing screw, the swift-charge hydraulic screen, the sandwich unwinding frame which can rotate within 360 degree. This machine can be suitable assembled with a single extruder, double extruders, multi extruders to realize multi layer co-extruding.

## Technical Specification

Single shower membrane complex

Three-layer (sandwich) complex

Multi-layers complex (after add extrusion can seven layers complex at one time).
