

Balanced Belts

Wiremeshbelt.net is one of the balanced belts manufacturer and supplier in Faridabad. We manufacture and supply in large amount of balanced belt all over Delhi - ncr area. Balanced Belt or balanced mesh belt are made with alternative right and left hand spirals joined by crimped connector rods. This is the reasons its big opening and spars, belts of this series are designed as winding rod to avoid the deviation caused by the transverse shaking of spirals.

Applications (Used) of Balanced Belt It is mostly used in food processes such as annealing glass, heat treating and drying. It is also used in baking bands It is used in medium load applications ranging 40 - 1500 degree F. It is too much economical for medium temperature and load conditions.

Details of Balanced Belts

Sr No.	Specifications	No. Of Spirals per feet	No. Of Cross-rods per feet	Spiral wire dia	Cross wire dia
1	B-12-12-10-08	12	12	10 swg	08 swg
2	B-12-12-3x2-10	12	12	Flat wire of 3x2 mm	10 swg
