

Roller Chains

Operating from the industrial location of Howrah, we have established ourselves as a highly renowned manufacturer, supplier, and exporter of Roller Chain. These chains have various uses in rolling mill, steel plant, cement plant, paper mill, engineering and chemical industries and have been designed to meet the clientsâ varied material handling requirements. The offered Industrial Roller Chain is available in simplex, duplex, and triplex designs and in a size ranging from 10 to 100 pitch. These Conveyor Roller Chain have been properly heated and reamed to provide it high tensile strength and long lasting durability.

Used with conveyors for carrying bulky materials, these Roller Chain is highly appreciated by our patrons for its robustness and precision. The offered range of chains is free from the problems of abrasion, corrosion or lack of lubrication. For extra fatigue resistance, this Roller Chain comes with a wide wasted plate shape and the spin riveted shape allows easy installation and maintenance. The complete set of the product comes with hollow bearing pin chain, cranked link chain, zinc/nickel plated chain and bush chain. We offer a high-quality range of Roller Chain at pocket-friendly rates and in sizes, designs, and lengths customized as per the requirements of clients.
