

Acrylic

Our Acrylic fabric, also known as Polyacrylonitrile, is a high quality, soft, lightweight and warm fabric. Closely resembling the look and feel of wool fibres, its fibres are very resilient compared to both other synthetic and wool fibres. The fiber requires heat to 'relax' or set the shape of the finished garment. It takes colour very well, is washable and hypoallergenic.

Available in various designs like plain, check, solid, dobby and jacquard, it caters to a wide range of individual preferences.

Our continuous Research & Development and strict quality control measures ensure flawless, top-notch quality fabric at competitive prices.

Design

FEATURES

- High retention
- High moisture wicking ability
- High heat retention ability

- Stretchability
- Skin Friendly
- Tear Strength

- Colorfastness
- Wrinkle Resistant
- Fine Finish
