

Conveyor Chains

We are a quality focused manufacturer, supplier, and exporter of an unmatched array of Conveyor Chain. The offered chain is treated for corrosion resistance and ability to withstand heat in tough working conditions. Made from Alloy Steel (20MnCr5, SAEm-8620, En-3ng and strong 53, En-8), this chain widely used to facilitate in the movement of conveyor systems such as conveyor belts. Several individual pendants are attached with each other to form a long and strong chain. To meet varied application needs, we offer our Conveyor Chain in the Size range of 2 Pitch to 12 Pitch or according to the Drawing & Specification send by clients

The movement of chain from one end to the other is possible owing to its rust resistant coating which enhances its movability. Our Conveyor Chain is used in various industries such as cement industry, material handling industry, paper mill, coal mines, and more. Offering heavy load support, our chain has the capacity to lift bulk materials without any hassle or fault. The links of the chain are strong and do not bend even after a high level of stress to keep the entire chain conveyor system to work smoothly. Moreover, the offered Conveyor Chain is designed as per the conveyor systems available in the market to assure compatibility.
