

Cranes

Eagle Electric Overhead Traveling Cranes are designed & manufactured in accordance with standards considering adequate factor of safety with respect to appropriate duty classifications. We offer product range of various cranes to suit High End Customers specific requirements to handle material most efficiently.

EOT Cranes

Eagle Electric Overhead Traveling Cranes are designed in SINGLE and DOUBLE Girder to suit the application. These cranes are designed as per the various standards for different duty. These tailor made cranes are such designed that it gives trouble free operations as per the site conditions.

Capacity : 500 Kgs. to 125,000 Kgs. and 250,000 kgs. in Tandem Operation.

JIB Cranes

Eagle make Jib Cranes have large heights and large boom length. Special foundation is carried out for this type of crane to withstand the unique technical specifications. These cranes are having 90° - 360° rotation. These rotation is manually as well as electrically.

Capacity : 500 Kgs. to 5,000 Kgs.

UnderSlung Cranes

Eagle manufactures Single Girder as well as Double Girder cranes in the Underslung version. Such cranes find applications where the headrooms available are limited or the process requirements cannot allow any other means of supporting the crane except from the roof.

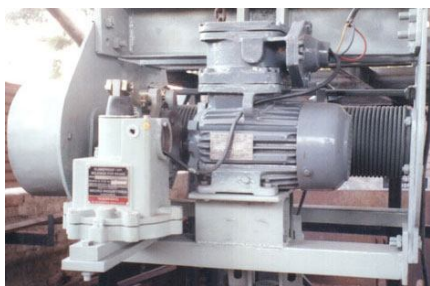

Goliath Cranes

Eagle make Goliath Cranes are having wide applications. These type of cranes are having high speeds, high cantilever arm, heavy capacity and a good height. These cranes are used in Shipping, Power, Ports, Heavy and Mining Sectors.

Capacity : 1000 Kgs. to 50,000 Kgs.

Flame Proof Cranes

Eagle make Flame Proof Cranes are best in industry. Irrespective of EOT, JIB or GOLIATH all flame proof cranes are having best in its class electrical enclosures as per IS-2148 or IS-60079-2007. All flame proof enclosures are having statutory approvals from government bodies throughout india. A great care has been taken while designing these type of cranes to suit the hazardous zone groups and areas.

High End Special Cranes

We specialized in making High End Microcontrolled Cranes which gives high accuracy in operation such as

Micro speed for Hoisting

Micro Speed for Cross travel or long travel

Tandem Operation

Auto Running alignments

Deslacking of Ropes

Load Limiting

And many others
