

Micro Pulverizer

Product Details of Micro Pulverizer

Fab-tech engineers manufacturing & design all type of Pulverizer. Micro Pulverizer is most suitable machine for salt & medium hard material grinding. Input the material feed through screw and then grind the material in chamber between hammer and liners. The Hammer offered in "T" shape, liner is serrated type and outlet screen is perforated. We achieve the fineness up to 150 meshes in some different kind of grinding material.

Application of Micro Pulverizer:

Pharmaceutical Industries, Food Industries, Chemical Industries, Agro Industries, etc.
