

# Roll Crushers

## Product Details of Roll Crusher

Most suitable machine for getting granules out of the brittle and hard material with very low fines generation.

- Capacity Range: 1.5 - 25 T.P.H
- Roll Dia: 300 - 800 MM

## Application:

Emery, Glass, Quartz, Ceramic, Minerals, etc.....

## Features of Roll Crusher

1. Very hard rolls of alloy steel to crush even the hardest material.
2. Tooth types of Roll Crushers are also available with the same roll sizes.
3. Separate drive for each roll is given so that rolls break the particles with minimum friction.
